

Are you partial to a nice cup of coffee but concerned about the waste that pod machines create?

Worry no longer! You can still use your pod machine in a more eco-friendly, sustainable way. Let

Paul Johnson, one of our amazing Waste Reduction Volunteers show you how in this quick, easy to follow video.

Description:

You can now buy a re-useable coffee pod from large online retailers by searching 're-useable coffee pod' and purchase some really nice filter coffee (which is essentially what is inside single use pre-packaged pods). Paul here is showing how you can fill the re-useable pod with your filter coffee, press it down, put the lid on and put it in to your coffee machine as you would normally with a single use pod. The make yourself another cup of coffee! Enjoy!

There are different types of re-useable pods available.
