

Transcript for Recycle week – Transfer station

Join Lisa and Nigel from Ansa Environmental Services, as they discuss recycling in Cheshire East

Lisa: We are here at Cledford Lane and I'm with the Waste Transfer Operative Nigel. I'm just going to ask him a couple of questions.

Hi Nigel.

Nigel: Hi Lisa, you okay?

Lisa: I'm alright thank you. What motivated you get this job and help the environment, by working for Ansa?

Nigel: Well what it was, I was on the Household Waste Site before I came here and this was the next step up into recycling and the things we do.

Lisa: Ah wonderful. So what do you in a nutshell?

Nigel: Well what we do, the wagons come in and we will just sort through the stuff, pull any bad stuff out that shouldn't be in there and then it gets loaded and sent to Shotton, where it's all sorted again.

Lisa: Oh that's wonderful. How important is it that residents know what they can and what they can't recycle?

Nigel: It's very important. We don't want batteries in there for a start. They cause fires. Just put the good stuff in there so we can protect the planet!

Lisa: Oh that's wonderful. Thank you Nigel. I think that sums it up in a nutshell.
