

Transcript for Green Johanna composing

I have been filling it up for a couple of years now and it is time to open it up and see what we have got inside and I am hoping, oh look at that, fantastic. Oh look how many worms! This is just absolutely gorgeous crumbly compost! I'm going to put it on my new flower bed! So if you want to have a go, Green Johanna. You can put absolutely anything in it. It is a sealed container so you can put cooked food in there as well as raw and look what you're gonna get!
